### Top Definition

#### [targeted individual](#)

Targeted Individuals are people who are illegally and covertly harassed, abused, gang-stalked and spied upon 24/7 by organized groups of persons.

There are several reasons why people become targets and they usually have something to do with sex and money, in that order. The targeting may have to do with a messy divorce, child custody, unrequited love, whistle-blowing, revenge, differences in social, political, or religious beliefs, etc.

Targeting for monetary reasons can include anything from denying you social security benefits or workmen's comp. to outright stealing from your bank account, from sexual slavery to embezzlement, and so on.

Targets should vehemently resist all attempts at being denied any and all kinds of government benefits. Appeal any bad decisions and if you don't like the next decision, appeal it again.

Another claim being made and that is that people might be being targeted for experimental reasons by the military or security agencies, usually, to test out how certain mind-control techniques and weapons work, which goes back to money or sexual slavery.

The main purpose of the assaults is to discredit and control targets. Harassment and abuse is often set up by corporations, businesses, organized criminals, street gangs, right-wing extremists, doctors, dentists, lawyers, or anyone who stands a chance of making any money off of targets.

Targeted Individuals are often hit with gassing (blowing noxious bio/chemical fumes into the target's environment) and they are attacked psychologically, as well. These abuses often lead to the need for psychological and physiological medical attention, thereby providing a good cash flow for the medical community and for big pharma., while taking care of someone's personal problem at the same time.

[Targeted Individual](#)

Targeted Individuals(TIs) are people who are illegally harassed, tortured, mind controlled, gang-stalked, and spied upon 24/7 by organized groups of persons. Targeting can be covert, or overt.

Mind control is a frequent report from targeted individuals. Torture is a frequent report from TIs. One frequent tactic used by the perpetrators of these targetings of people, is to use electronic telepathy technology(Microwaves/Electromagnetics - Google: Microwave Auditory Effect) on the targets to get them diagnosed as schizophrenic, so nobody will believe them.

A theme with targeting is that it is for life...

Factions within the US Military and Intelligence network are the biggest source of targeting on earth. Advanced technology is used against targeted individuals worldwide. Dr. Jose Delgado in the 1960's developed implants that could control the minds of people who have them. He later said they found electromagnetics could do all the same stuff without the need for surgery...

Targeted Individuals come in all shapes and sizes.

Targeted Individuals are very unlucky...

[targeted individual](#)

"Targeted Individual" is a term that lunatics use to describe themselves to explain why their shitty lives are not their fault. "Targeted Individuals" allege that there is a global conspiracy of "[gang stalkers](#)" who are constantly messing with them, but the reality is that "targeted individuals" are just plain nuts. Their lives are shitty because they are [crazy](#), not because there is a secret [reptoid](#) government beaming invisible lasers into their brains from space satellites.

Nadine Siracusa says she's a targeted individual, but she's actually just [batshit](#) crazy.
